2nd Asia Cyber Risk Summit

15-16 June 2017 • Mandarin Orchard Hotel, Singapore

With organisations actively venturing into the digital and cyber space, cyber risks become a reality for all. Cyber attacks are no longer new to organisations, with reports surfacing often, affecting large multi-national organisations, government bodies and majority of small and medium enterprises. The message is clear: no one is spared. Although the awareness of cyber threats has been increasing, many still remain vulnerable to these attacks.

Though Insurers have been pushing to provide cyber coverage, cyber liability remains an extremely complex problem that they cannot manage alone. There is a need to be actively partnering public and international bodies that have long been tackling cyber issues. There remains a huge aspect of cyber risks that Insurers have yet to fully understand. Cybercriminals remain ahead in this cat and mouse game against the defenders, and the list of threats will only grow. How can Insurers protect themselves and at the same time provide a safety net for their clients? This is a dynamic role that Insurers must now embrace and juggle.

This 2nd Asia Cyber Risk Summit is aimed at keeping the industry apprised of with the latest developments in the cyber space, the trending threats and how to deal with these threats while responding to the growing demand for cyber protection.

With threats come opportunities. Are you ready to tap into this whole new world of business that some expect to be bigger than the Nat CAT portfolio.
