With all the disruption taking place, one thing remains permanent: the purpose of insurance to settle legitimate claims. That is the unshakeable *raison d'être* of insurance. So it is time to use claims to win the game and not shy away. This Summit will tackle this critical paradox of efficient underwriting and effective claims management as often claims are naively seen as the weak side of poor underwriting and actively defended.

Digital and technology has shaken several core beliefs and even turned USPs of many businesses on its heel. Algorithms, big data sets and chatbots are now being used to take customers through applications. Robots are learning the business of covering risks. And data analysis and AI can spot fraud patterns quickly. How is the Insurance industry going to leverage on such endless potential and possibilities? The future of insurance will not be denied.

Join our Claims and Underwriting Experts at this Asia Summit as they share their practical case studies and insights. It will be an exclusive high tech platform to see the world as it has evolved with technology allowing the adoption of expert strategies in underwriting and claims management to reduce turnaround time and maximize customer experiences to make customers and insurers winners. This is a **MUST ATTEND** Conference as it will help you stay relevant with tips on best practices in analysing underwriting data and claim procedures to be efficient in cost control as well.

PROGRAMME

Monday, 19th November 2018

8.00am **Registration and Coffee**
